

SZKOLENIE ŚREDNIO ZAAWANSOWANE

Linux for UNIX Administrators

U2794S

Czas trwania: 5 dni

This is an accelerated course for experienced UNIX administrators desiring to develop an understanding of the skills required to administer Red Hat or SUSE Linux-based systems in their enterprise computing environments. It combines the topics in H7091S and H7092S. This course should also help prepare students for Linux certification exams such as the LPI 101/102 required for Linux Professional Institute Level One certification.

Cele szkolenia

- Successfully install, configure, and bring a Linux system online.
- Learn the Linux approach to system administration tasks.
- Gain an understanding of the Linux user interfaces, file systems, and run states.
- Acquire the techniques for recovering an unbootable system.
- Gain knowledge of Linux disk space management options.
- Effectively manage software packages.
- Efficiently use networking services and security options.

Zalety

- IDC MarketScape leader 4 years running for IT education and training
- Recognized by IDC for leading with global coverage, unmatched technical expertise, and targeted education consulting services
- Key partnerships with industry leaders OpenStack, VMware, Linux, Microsoft, ITIL, PMI, CSA, and (ISC)2
- Complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom, video on-demand instruction, live virtual instructor-led with hands-on lab, dedicated onsite training
- Simplified purchase option with HPE Training Credits

Dla kogo?

- Experienced UNIX system administrators
new to Linux.

Wymagania

- Experience as a UNIX system administrator is required and a good understanding of network concepts, the TCP/IP protocol suite, and basic UNIX security is also assumed.

- The accelerated pace of this course is only possible if students are already comfortable with basic HP-UX or Sun Solaris system administration concepts and tasks.
